PEQUEÑO Y ELEGANTE INODORO INTELIGENTE

- Cubierta de apertura automática de modos duales.
- Toque el pie para abrir la tapa.
- Enrojecimiento al tocar los pies.

Pantalla LED.
Una perilla clave.
Una clave para detenerse.
Silenciar Y ralentizar.
lavado femenino.
Lavado Móvil.
Masaje y lavado.
Boquilla autolimpiante.
Regulación de pulverización.
Agua caliente al instante.
Luz de noche.
Inducción del asiento.
Calefacción de asiento.
Secado con aire caliente.
Ajuste de temperatura del viento.
Ajuste de temperatura del agua.
Ajuste de presión de agua.
Lavado automático.
Enjuague durante un corte de energía.
Protección contra fugas.
Electricidad de la provincia de energía.
Memoria de apagado.
Esmalte de limpieza inteligente.
Material retardante de llama.
Tensión de seguridad de 12 V.

SMALL AND DAPPER SMALL SAMRT TOILET

- Dual modes auto open cover.
- Foot touch open flip.
- Foot touch flushing.

LED Screen.
One Key Knob.
A Key to Stop.
Mute Slow Down.
Female Washing.
Mobile Washing.
Massage Washing.
Self-cleaning Nozzle.
Spray regulation.
Heated Water Instantly.
Night Light.
Seat Induction.
Seat Heating.
Warm air drying.
Wind Temperature Adjust.
Water Temperature Adjust.
Water Pressure Adjust.
Auto Flushing.
Flush During Power Failure.
Leakage Protection.
Energy province electricity.
Power Off Memory.
Smart cleaning glaze.
Flame retardant material.
12V safety voltage.

PETIT ET ÉLÉGANT TOILETTES INTELLIGENTES

- Couvercle à ouverture automatique à deux modes.
- Flip ouvert au toucher du pied.
- Rinçage au contact des pieds.

Ecran LED.
Un bouton clé.
Une clé pour arrêter.
Ralentissement muet.
Lavage féminin.
Lavage mobile.
Massage Lavage.
Buse autonettoyante.
Régulation de pulvérisation.
Eau chauffée instantanément.
Veilleuse.

A modern bathroom vanity setup against a light-colored wall. Two large, oval-shaped mirrors are mounted on the wall, one with a dark brown frame and the other with a dark grey frame. Below the mirrors is a white, rectangular, wall-mounted sink. The sink is supported by a light-colored, textured stone countertop. On the countertop, there are several items: a stack of rolled-up towels on the left, and a collection of toiletries (bottles, jars, and a toothbrush holder) on the right. The overall aesthetic is minimalist and contemporary.

MANTENIMIENTO Y CUIDADO DIARIO

Es realmente sencillo mantener su apariencia como el primer día al hacer la limpieza diaria habitual.

Para la limpieza ordinaria, utilizar agua con jabón o un producto de limpieza de superficies común. Retire el exceso de detergente con otro paño suave, aclare la superficie con agua tibia y séquela con un paño suave. Si es necesario, utilice un paño de microfibra con un limpiador con base de amoníaco, frote la mancha, y después aclare con agua. De este modo se eliminarán suciedad y residuos. Al limpiar, hágalo siempre con movimientos circulares, de delante hacia atrás, y después de lado a lado hasta cubrir toda el área. Es importante secar bien la superficie con un paño de microfibra cuando se derrame líquido o tras limpiar.

LIMPIEZA ESPECÍFICA PARA MANCHAS DIFÍCILES.

Es posible que haya que insistir más con los residuos o manchas difíciles. A continuación le ofrecemos una serie de recomendaciones para limpiar de manera efectiva estas manchas concretas: Vinagre, café, té, zumo de limón, jugo de verduras, tintes, ketchup, polen de lirio, azafrán, arañazos superficiales, quemaduras de cigarrillos, betún, tinta, rotulador, yodo, moho, mercurio, sangre, vino tinto, perfume: para estos supuestos, utilice un paño de microfibra húmedo con un limpiador abrasivo suave.

Grasas, aceites y residuos grasientos u oleosos: con un paño de microfibra, frote la mancha con un poco de lejía diluida. Aclárela varias veces con agua tibia y séquela con un paño suave. La lejía puede decolorar fregaderos y lavabos Corian® Solid Surface si no se aclara con agua.

Incrustaciones de cal de aguas duras, jabón, minerales: con un paño de microfibra, frote la mancha con un producto anti-cal doméstico o vinagre y déjelo actuar durante 2 – 4 minutos. Con otro paño de microfibra, aclare bien el área con agua. Esmalte de uñas: con un paño de microfibra, frote la mancha con un quitaesmalte sin acetona. Aclárela varias veces con agua tibia y séquela con un paño suave.

Si la mancha continúa siendo visible, repita la operación, esta vez con una lija muy fina. Si el daño fuera grave, quizás llegue a ser necesario lijar la superficie ligeramente. Para ello, realice los siguientes pasos:

- Utilizar un limpiador abrasivo y una esponja tipo Scotch-Brite®. Después, pulir a mano ligeramente la zona afectada.
- Si aún así no queda bien, lije la superficie a mano con una lija de grano muy fino (por ejemplo, P400) apta para uso húmedo y en seco. Para reducir la cantidad de polvo generado, humedezca antes la zona a reparar.
- Si el paso anterior tampoco hubiera sido suficiente, use una máquina de lijar y una lija con el grano más grueso, por ejemplo, P180. Para reducir la cantidad de polvo generado, humedezca antes, también en este paso, la zona a reparar.

Evite el contacto de la encimera con sustancias químicas fuertes como disolventes de pintura, limpiadores de hornos, limpiadores de desagües con ácidos, quitaesmaltes con acetona, etc. Si se produce un derrame, lave enseguida la superficie con agua.

No limpiar con agentes químicos agresivos como acetona, limpiadores de hornos, disolventes, ácidos fuertes (ácido clorhídrico, etc.) o bases fuertes (sosa caustica, etc.), ni detergentes industriales o disolventes de pintura. Si se produce un derrame, lave enseguida la superficie con agua. No utilizar rascadores de metal, cepillos metálicos u otros utensilios domésticos de metal para eliminar manchas, pintura, yeso u otras sustancias.

GLASS 2.0

CRISTAL 2.0

ANTI-SCRATCH GLASS 2.0

CRISTAL 2.0 ANTI-RASGUÑOS

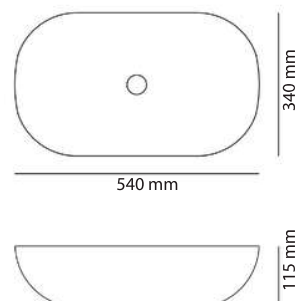

Our Glass collection is made with our innovative Anti-Scratch 2.0. A protective coating that guarantees a surface free of scratches. This coating not only protects the washbasin but also gives them a unique and modern matte black aesthetic.

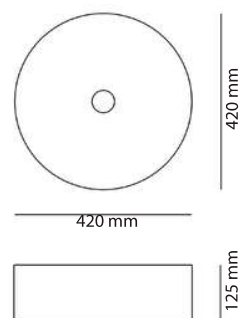

Nuestra colección Cristal está hecha con nuestro innovador Cristal Anti-Rasguño. Un revestimiento protector que garantiza una superficie libre de rasguños. Este revestimiento no solo protege los lavabos sino que también les confiere una estética negra mate única y moderna.

STRUCTURES ESTRUCTURAS

Both Aluminum and Stainless Steel Structures have a square profile. The Aluminum one can be epoxy lacquered in matte black or white. These minimal dovetail structure provides the strongest mechanical bond simply by the joinery of shaped fingers. To achieve a rigid, robust and compact structure, conical screws are used in order to connect all the elements in the structure.

We manufacture our structures with the following profiles thicknesses:
20 x 20 mm

Additionally, we can manufacture any design; our structures are fully customizable.

ALUMINUM | ALUMINIO
+
STAINLESS STEEL | ACERO INOX

Tanto las estructuras de Aluminio como las de Acero Inoxidable tienen un perfil de 20x20 mm. Las estructuras de Aluminio pueden ser lacado con epoxi en negro mate o blanco. Estas estructuras minimalistas proporcionan la unión mecánica más fuerte posible, mediante la unión de machihembrado. Para lograr una estructura rígida, robusta y compacta, se utilizan tornillos cónicos para conectar todos los elementos de la estructura.

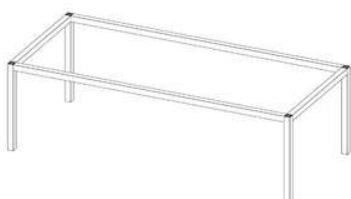

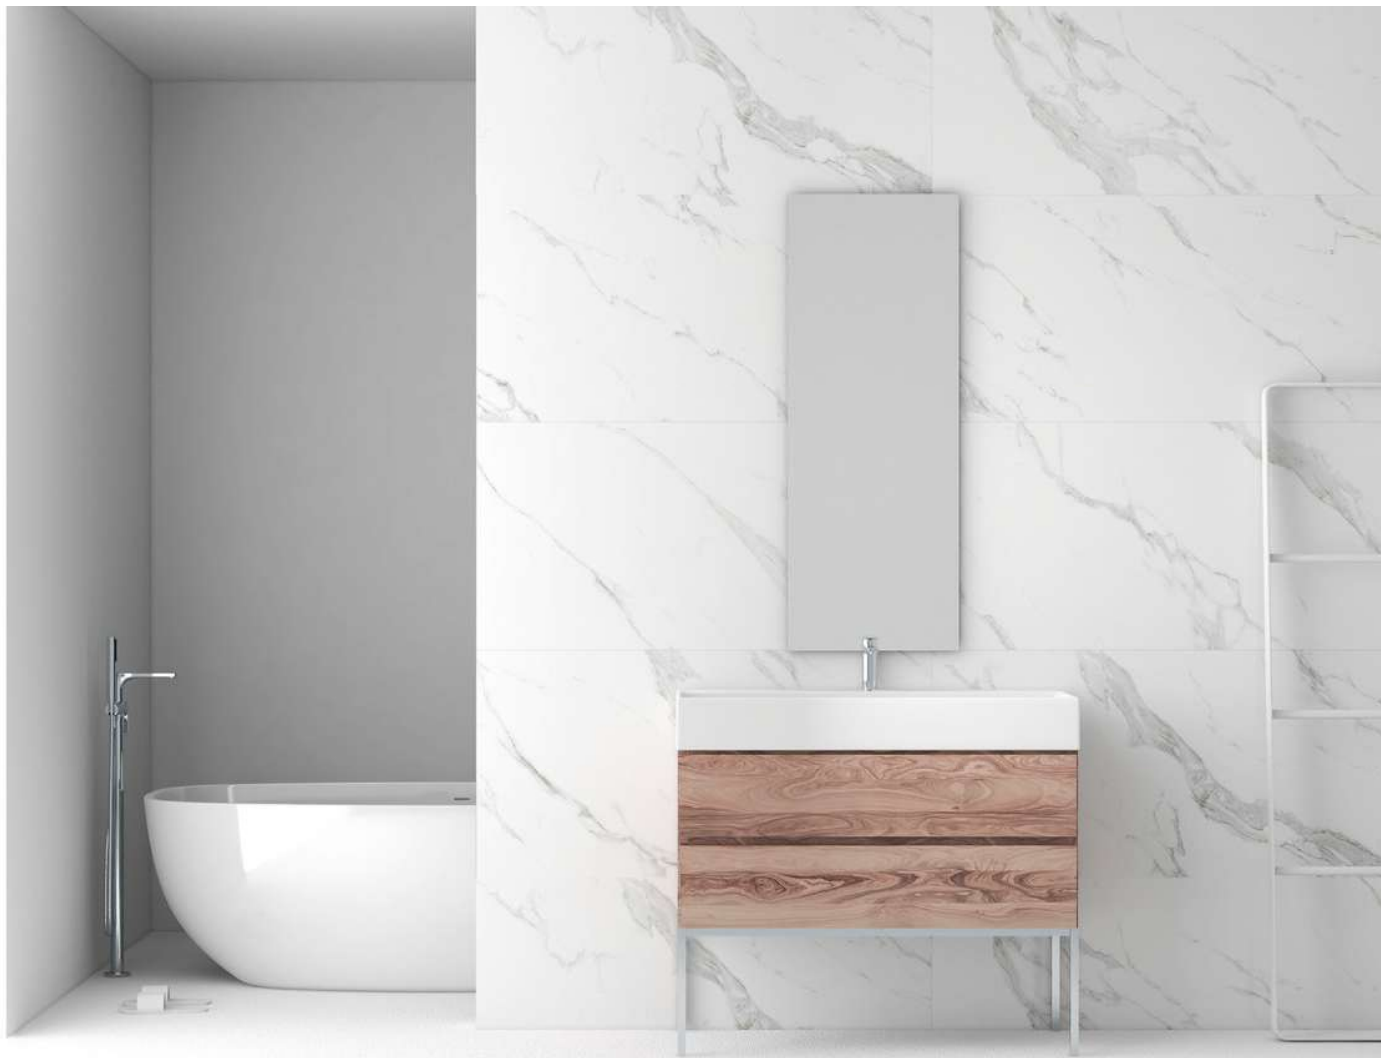

Producimos nuestras estructuras con los siguientes espesores:
20 x 20 mm

Adicionalmente, podemos producir cualquier diseño, nuestras estructuras son completamente personalizables.
